Capture family memories with the quality they deserve

A telephoto zoom for everyone who treasures family memories

The new telephoto zoom from Tamron, designed exclusively for digital SLR cameras,* is ideal for anyone who wants to capture truly dynamic telephoto images. It goes far beyond the capabilities of the standard zoom that comes with a digital SLR camera. Lightweight and compact, this zoom lens makes 300mm-equivalent telephoto power** accessible to everyone. Ideal for photos of family fun, sport events, scenery, and portraiture, the lens naturally creates a out-of-focus background that emphasizes the main subject of your photo. It's perfect for capturing the happy faces of children as they play.

*With imagers 24mm x 16mm or smaller.

**This lens is equivalent to 85-310mm zoom when converted to 35mm film format.

Exclusive design for digital cameras delivers quality you can count on

This lens provides outstanding optical performance over the entire zoom range with a Low Dispersion glass element that minimizes on-axis and lateral chromatic aberrations, a critical factor in enhancing the optical quality of digital photography. Designed exclusively for digital SLRs, it features Tamron's latest advanced technologies, such as Internal Surface Coatings,* to suppress flare and ghosting and reduce the loss of peripheral light that often occurs with digital imagers. This lens makes digital photography better than ever.

*Multiple-layer coatings between lens elements attached to each other.

Intimate details, beautifully rendered

This telephoto zoom lens realizes a minimum focus distance of 0.95m over the entire zoom range, for genuine close-up photography (maximum magnification ratio of 1:3.5*). With its virtually circular, nine-blade diaphragm design, the lens delivers a beautifully smooth out-of-focus background. Enjoy a great combination of telephoto and real macro photography in a single lens.

*The MMR of 1:3.5 is equivalent to 1:2.3 on a 35mm camera.

200mm (Equivalent to 310mm) Exposure: Aperture fully opened Auto ISO100
MFD: 0.95m Maximum Magnification Ratio: 1:3.5

● Specifications

Model	A15
Focal Length	55-200mm
Maximum Aperture	F/4-5.6
Angle of View	(Diagonal) 28°28'-7°59' (Horizontal) 23°49'-6°38' (Vertical) 16°1'-4°15'
Lens Construction	13 elements in 9 groups
Minimum Focus Distance	0.95m(37.4") (The entire zoom range)
Max.Mag.Ratio	1:3.5 (at f=200mm, MFD:0.95m)
Overall Length	83.0mm (3.3")*
Maximum Diameter	ø71.6mm (2.8")
Filter Size	ø52mm
Weight	295g (10.6oz.)*
Diaphragm Blades	9
Minimum Aperture	F/32
Standard Accessory	Lens hood
Compatible Mount	Canon AF, Konica Minolta AF-D and Nikon AF-D

*Values given are for Nikon AF cameras.
